

Teakwood gets cherry on top

Silverware and plaques are piling up in the Durban refinery's office and FFS head office.

The Durban branch at Teakwood Road has now achieved a new level of excellence by winning the overall winner trophy in the chemical industries category of the 2006 waste management awards competition.

Branch manager Mark de Souza says the enthusiasm and commitment of staff and management has ensured a string of successes. "We first entered

for the biennial waste management awards competition in 2000 and received a merit award. This was followed by silver awards in 2002 and 2004, and the KZN cleaner production award in 2004. Recognition also came from the Rose Foundation in 2004 for the best environmental improvement performance within the FFS refineries. The 2006 waste management silver award and overall winner trophy was the cherry on top." ■

Mark de Souza, FFS Refiners Durban branch manager, with the overall winner trophy in the chemical industries category of the 2006 Waste Management Awards competition. Looking on are Sue Beningfield, chairman in KZN of the Institute of Waste Management and Dr Timothy Fasheun, director of pollution and waste management in the Department of Agriculture and Environmental Affairs.
